## **MiTek Expands Presence in Ho Chi Minh City, Vietnam to Support Team and Customer Growth**

**March 14, 2024 – Ho Chi Minh City, Vietnam –** MiTek®, a global supplier of integrated software, services, engineered products, and automated solutions for the building industry worldwide, is opening a new 135,000-square-foot (12,534-square-meter) office to serve its 2,600 team-member Global Services function based in Ho Chi Minh City, Vietnam. MiTek Global Services – through its unique dedicated model – provides college-educated, highly-skilled construction design staff that enable customers to meet their drafting, design, estimating, and visualization demands while also scaling and growing their business. As a result of continued growth over the last decade, a new building with nearly 1,500 workspaces broke ground in 2022 and culminated in a grand opening on March 14, 2024.

“The last time we built an office of this caliber from the ground up was our global headquarters in Chesterfield, Missouri, in 2015,” said Chris Hollander, President, MiTek Global Services “This building is more than just a structure, it’s a testament to MiTek’s growth, resilience, and dedication to creating spaces that inspire creativity, foster collaboration, and drive innovation. It’s a reflection of our unwavering commitment to providing our team members with an environment where they can thrive and excel, and where our customers can experience world-class service and support.”

The new building is the second office built in Ho Chi Minh City to house MiTek’s Global Services team and is connected by a breezeway to the original office building. MiTek also leases two other office spaces in Ho Chi Minh City.

The new campus includes a restaurant capable of providing 3,000 lunches daily, which fully opens onto a sports pitch. Additionally, there is a 200-seat, theater-style multipurpose room, an executive floor with a private space for customers to work and relax, and a rooftop entertainment space with a mini stage and digital screen. Underground, the building has a double level basement providing parking space for thousands of motorbikes.

In keeping with MiTek’s commitment to team member safety, security, and comfort, the building incorporates automatic recognition systems in place for secure bike parking and staff log-in/log-out procedures. The building also features a state-of-the-art air quality control system that is fully automatic and can adjust to the conditions inside and outside the office environment.

“At MiTek, we’re endeavoring to reimagine and reengineer the entire construction process,” Hollander said. “And to truly optimize building, we have to start with design, which is why the work of our Services team has never been more important. By unlocking the power of design, not only are we enabling our customers to grow and scale, we’re also enabling more efficient and sustainable building methods that we believe have the power to transform communities.”

###

## **About MiTek**

MiTek is a construction technology leader on a mission to advance the adoption of offsite construction. MiTek exists to transform communities through more efficient and sustainable building methods. In 1955, MiTek changed residential construction with the invention of the Gang-Nail plate, providing an affordable and scalable way to manufacture wood trusses. Today, MiTek serves residential and commercial customers delivering software, services, engineered products, and automated solutions that optimize a more integrated Design-Make-Build™ approach to construction. By enabling upfront collaboration across the value chain, including architects, engineers, builders, component manufacturers, and more, we create a single source of truth that guides each design decision and unlocks the power of offsite construction.

With more than 6,000 team members worldwide, MiTek enables the delivery of exceptionally streamlined builds, offering higher quality, increased speed, less waste, and more value, and in turn, transforming how the world builds. As a Berkshire Hathaway (NYSE: BRK-A, NYSE: BRK-B) company since 2001, MiTek has a record of continuous growth and innovation. Learn more at [mii.com](https://www.mii.com).
