

SOFTWARE

# One Platform to Optimize Operations & Eliminate Inefficiencies

**MiTek<sup>®</sup>**  
**KOVA<sup>®</sup>**

A homebuilding business management software that gives you greater control of your business through a single integrated system.

Homebuilders lose up to 50%\* of their margin to inefficiencies and variances (VPOs). With various functions like sales, purchasing, and scheduling operating on different systems, small inefficiencies across hundreds to thousands of homes a year significantly amplify losses.

**MiTek<sup>®</sup>**

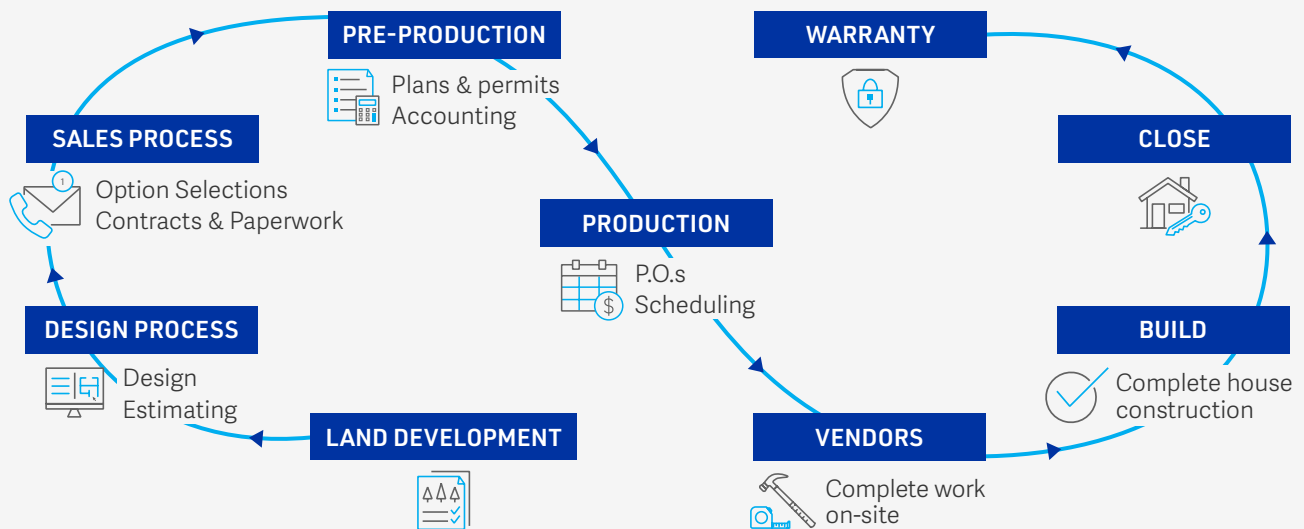

Take control of your operations with the advanced capabilities of MiTek Kova software.

- **Accurate sales orders:** Prevent erroneous orders before they happen. The rules engine is a powerful tool that prevents your sales team from selling an unbuildable house, ultimately saving you and your customers money and frustration.
- **Reduce errors and rework in the field:** The fully integrated software ensures data is seamlessly and instantly shared with all teams and build phases, whether you're in the office or on the job site.
- **API connections:** You can tailor the system to your needs. Connect with any accounting software, CRM tool, website, or create your own.

A single ecosystem that supports your business processes from Land Development to Warranty.
