# All Your Options, Automated

## MiTek®
## ARRAY™

## Version your plans and scale your operation with a vast array of automated options (and options-on-options).

Introducing MiTek® Array™, a Revit® plugin that delivers previously unavailable functionality for production builders to effectively create and manage their library of options, models, sheets, and materials.

### LESS OVERHEAD + MORE PRODUCTIVITY

### BENEFITS

→ Generate site-specific files separate from the main model instantly in a single Revit file.

→ Add options in the precise geometric space as the base model for more accurate 3D placement.

→ A centralized repository containing all the options across all models.

→ Tailored regional options provide a personalized experience while adhering to main requirements.

*Available with add-on functionality.

→ Add modifications for specific conditions or selections (e.g., doors, windows, materials and toggle on/off to reduce the total options designed.

→ Save time and effort by automating exterior dimensioning of floor plans during drafting.*

→ Harvest element data from Revit by option and export to Excel to efficiently price by options.*
